

SPILL CLEANER

Offshore surveillance and cleanup missions

Offshore, oil spills often occur in heavy weather. Hydrocarbons must be recoverable whatever the weather conditions. However these events are occasional so a dedicated cleaning vessels has to be multiservice.

SpillCleaners are multipurpose vessels that combine the functionality of an offshore vessel with those of a cleanup vessel.

Built in aluminum, to international standards, they are able to intervene on various missions offshore and over long periods.

Thanks to their patented self-floating arms, they can retrieve spilled hydrocarbons even in rough sea.

APPLICATIONS

- Hydrocarbons
- Solid waste
- Firefighting
- Crane lifting
- Towing
- Offshore surveillance
- Assistance
- Maritime operations
- Merchandise carrying
- Personnel transportation

SPILL CLEANER

Vessels from 20 m and more

SpillCleaner 180

Length	18 m
Solid waste	20 tonnes
Liquid waste	35 m ³
Suction capacity	5 500 m ³ /h

SpillCleaner 250

Length	25 m
Solid waste	30 tonnes
Liquid waste	120 m ³
Suction capacity	8 000 m ³ /h

High speed setup available :
FastCleaner 250

SpillCleaner 460

Length	46 m
Solid waste	50 tonnes
Liquid waste	200 m ³
Suction capacity	10 000 m ³ /h

SpillCleaner 650

Length	65 m
Solid waste	200 tonnes
Liquid waste	300 m ³
Suction capacity	15 000 m ³ /h
