

WASTE CLEANER

Coastal and inland waterways cleaning

In ports, both solid and liquid waste often accumulate along jetties and in tight corners where access is difficult. Equipped with rolling fenders, WasteCleaners can slide along jetties or remove garbage between parked boats.

WasteCleaners are marine vacuum cleaners cleaning the surface of the water only requiring a single operator.

Built in aluminum, at road transportation size, they can easily be dispatched anywhere using a boat trailer. The WasteCleaners possess a single hoisting pad allowing an easy crane deployment.

APPLICATIONS

- Solid waste
- Hydrocarbons
- Black/grey waters (option)
- Plants (weedcutter option)
- Jellyfish
- Sewage discharge

WASTE CLEANER

Ships from 6 to 10 m at road size

WasteCleaner 66

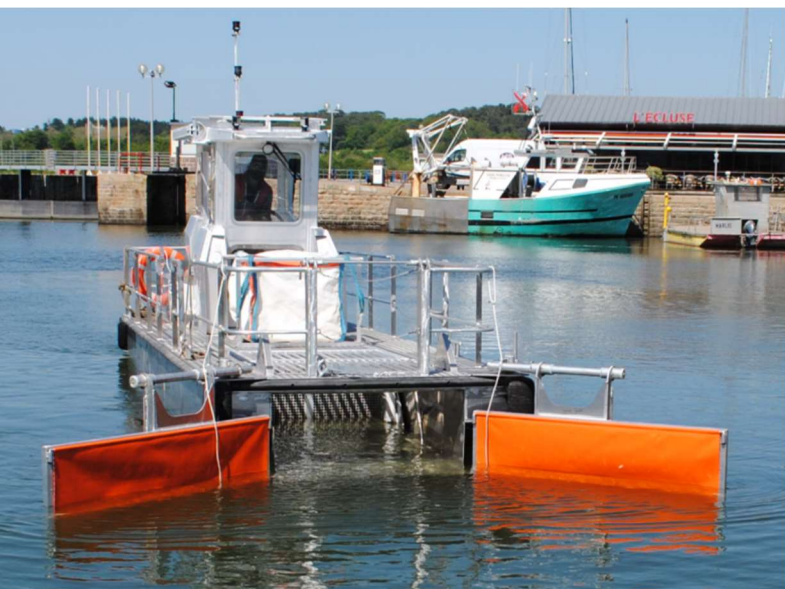

Available in 100 % electric propulsion
Fits in a 40' HC container

Length	6.60	m
Solid waste	500	kg
Liquid waste	1 000	L
Suction capacity	750	m ³ /h

WasteCleaner 83

Available in high speed setup : 19 knots

Length	7.50	m
Solid waste	800	kg
Liquid waste	1 200	L
Suction capacity	950	m ³ /h

WasteCleaner 92

Barge type
Diesel inboard engine

Length	9.20	m
Solid waste	1 200	kg
Liquid waste	2 700	L
Suction capacity	1 500	m ³ /h
